**Sign up for online prebooked meetings!**

**May 28-29  
free of charge  
digital**

**REGISTER  
HERE**

Textile Connect is an online platform that facilitates connections between companies, designers, and production partners within the textile industry. For the fifth year in a row, we are organizing an online matchmaking event where buyers and suppliers can meet and collaborate. This year, the matchmaking event will take place on May 28-29th.

In recent years, this event has attracted nearly 2000 textile companies and designers from all over the world, many international cooperation agreements have been signed. The companies enjoyed the opportunity to make useful international contacts via this platform.

**Registration already open:** <https://textileconnect25.b2match.io/>

**Participation in free of charge!**

**Feedback from last year's matchmaking:**

*"The meetings and people attending were great. The meeting even made me start my own fashion brand. I'm looking forward to next year."*

*"Web meetings are very cost-effective and environmentally friendly."*

*"Great to be able to meet people from all over the world without having to travel."*

*"Such specialized B2B events like Textile Connect provide a great opportunity to communicate, cooperate and search for right partners. The platform itself is very clear, technically – very simple to use. We were looking for designer and I am happy we have already signed a contract with a designer I met at Textile Connect platform."*

*"Our sewing factory is orientated towards small customers who are interested to produce small quantities and want to receive high quality services. We really liked participating in Textile Connect 2023, because this platform is customized to search for clients according to your needs and possibilities."*

**Register today to take advantage of this unique opportunity!**
